

AQUA

PROFESSIONAL SWIMMING POOL PUMP

ENERGY-SAVING EXCELLENCE VOYAGE IN TRANQUILITY

Sturdy and durable, safe and reliable

Create a quiet and comfortable swimming pool environment

Pump body constructed with specialized materials, pressure-resistant up to 6kg/cm²

Withstands water temperature up to 70°C

NEW

AKS SERIES
(AKS050-AKS200)

AQUA AKS PROFESSIONAL SWIMMING POOL PUMP

Durable and Reliable, Safe and Secure

Specialized material construction withstands pressure up to 6kg/cm², long-lasting and safety performance.

Easy Maintenance, Effortless Care

Simple design with removable hair Strainer, convenient for cleaning and maintenance to prolong service life.

Quiet Operation, Comfortable Experience

Ultra-silent design with IP55-rated motor, creates a comfortable pool environment.

Quick Installation

Come with two standard DN40 unions for easy and fast connection.

Strong Self-Priming, Uninterrupted Swimming

Unique pump housing design with powerful suction, rapid start-up, ensures efficient and stable water circulation.

Wide Compatibility, Versatile Application

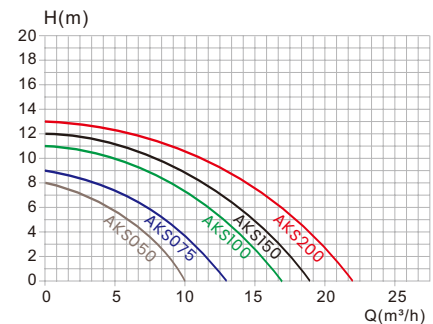

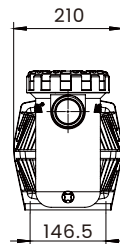

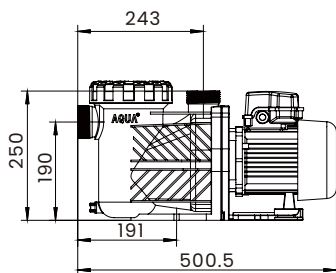

Easy installation, withstands water temperature up to 70°C, suitable for multiple usage scenarios.

Precision Engineering, Long-Term Stability

Specially crafted impeller, 316L mechanical seal, adaptable to various water conditions, ensuring long stable operation.

High-temperature resistant flange (optional)

Model	Voltage	Power	H-max	Q-max	Motor Speed
	(v)	(kW)	(m)	(m³/h)	(r/min)
