

AQUA

# Variable speed, Big Flow

Max working temperature of 60°C hot springs water, with a pressure resistance of 6kg/cm<sup>2</sup>.  
Can be used in salt water (Salinity max 0.5%).

**AVK Series Variable Speed Pump**

Professional choice for swimming pool water treatment equipment

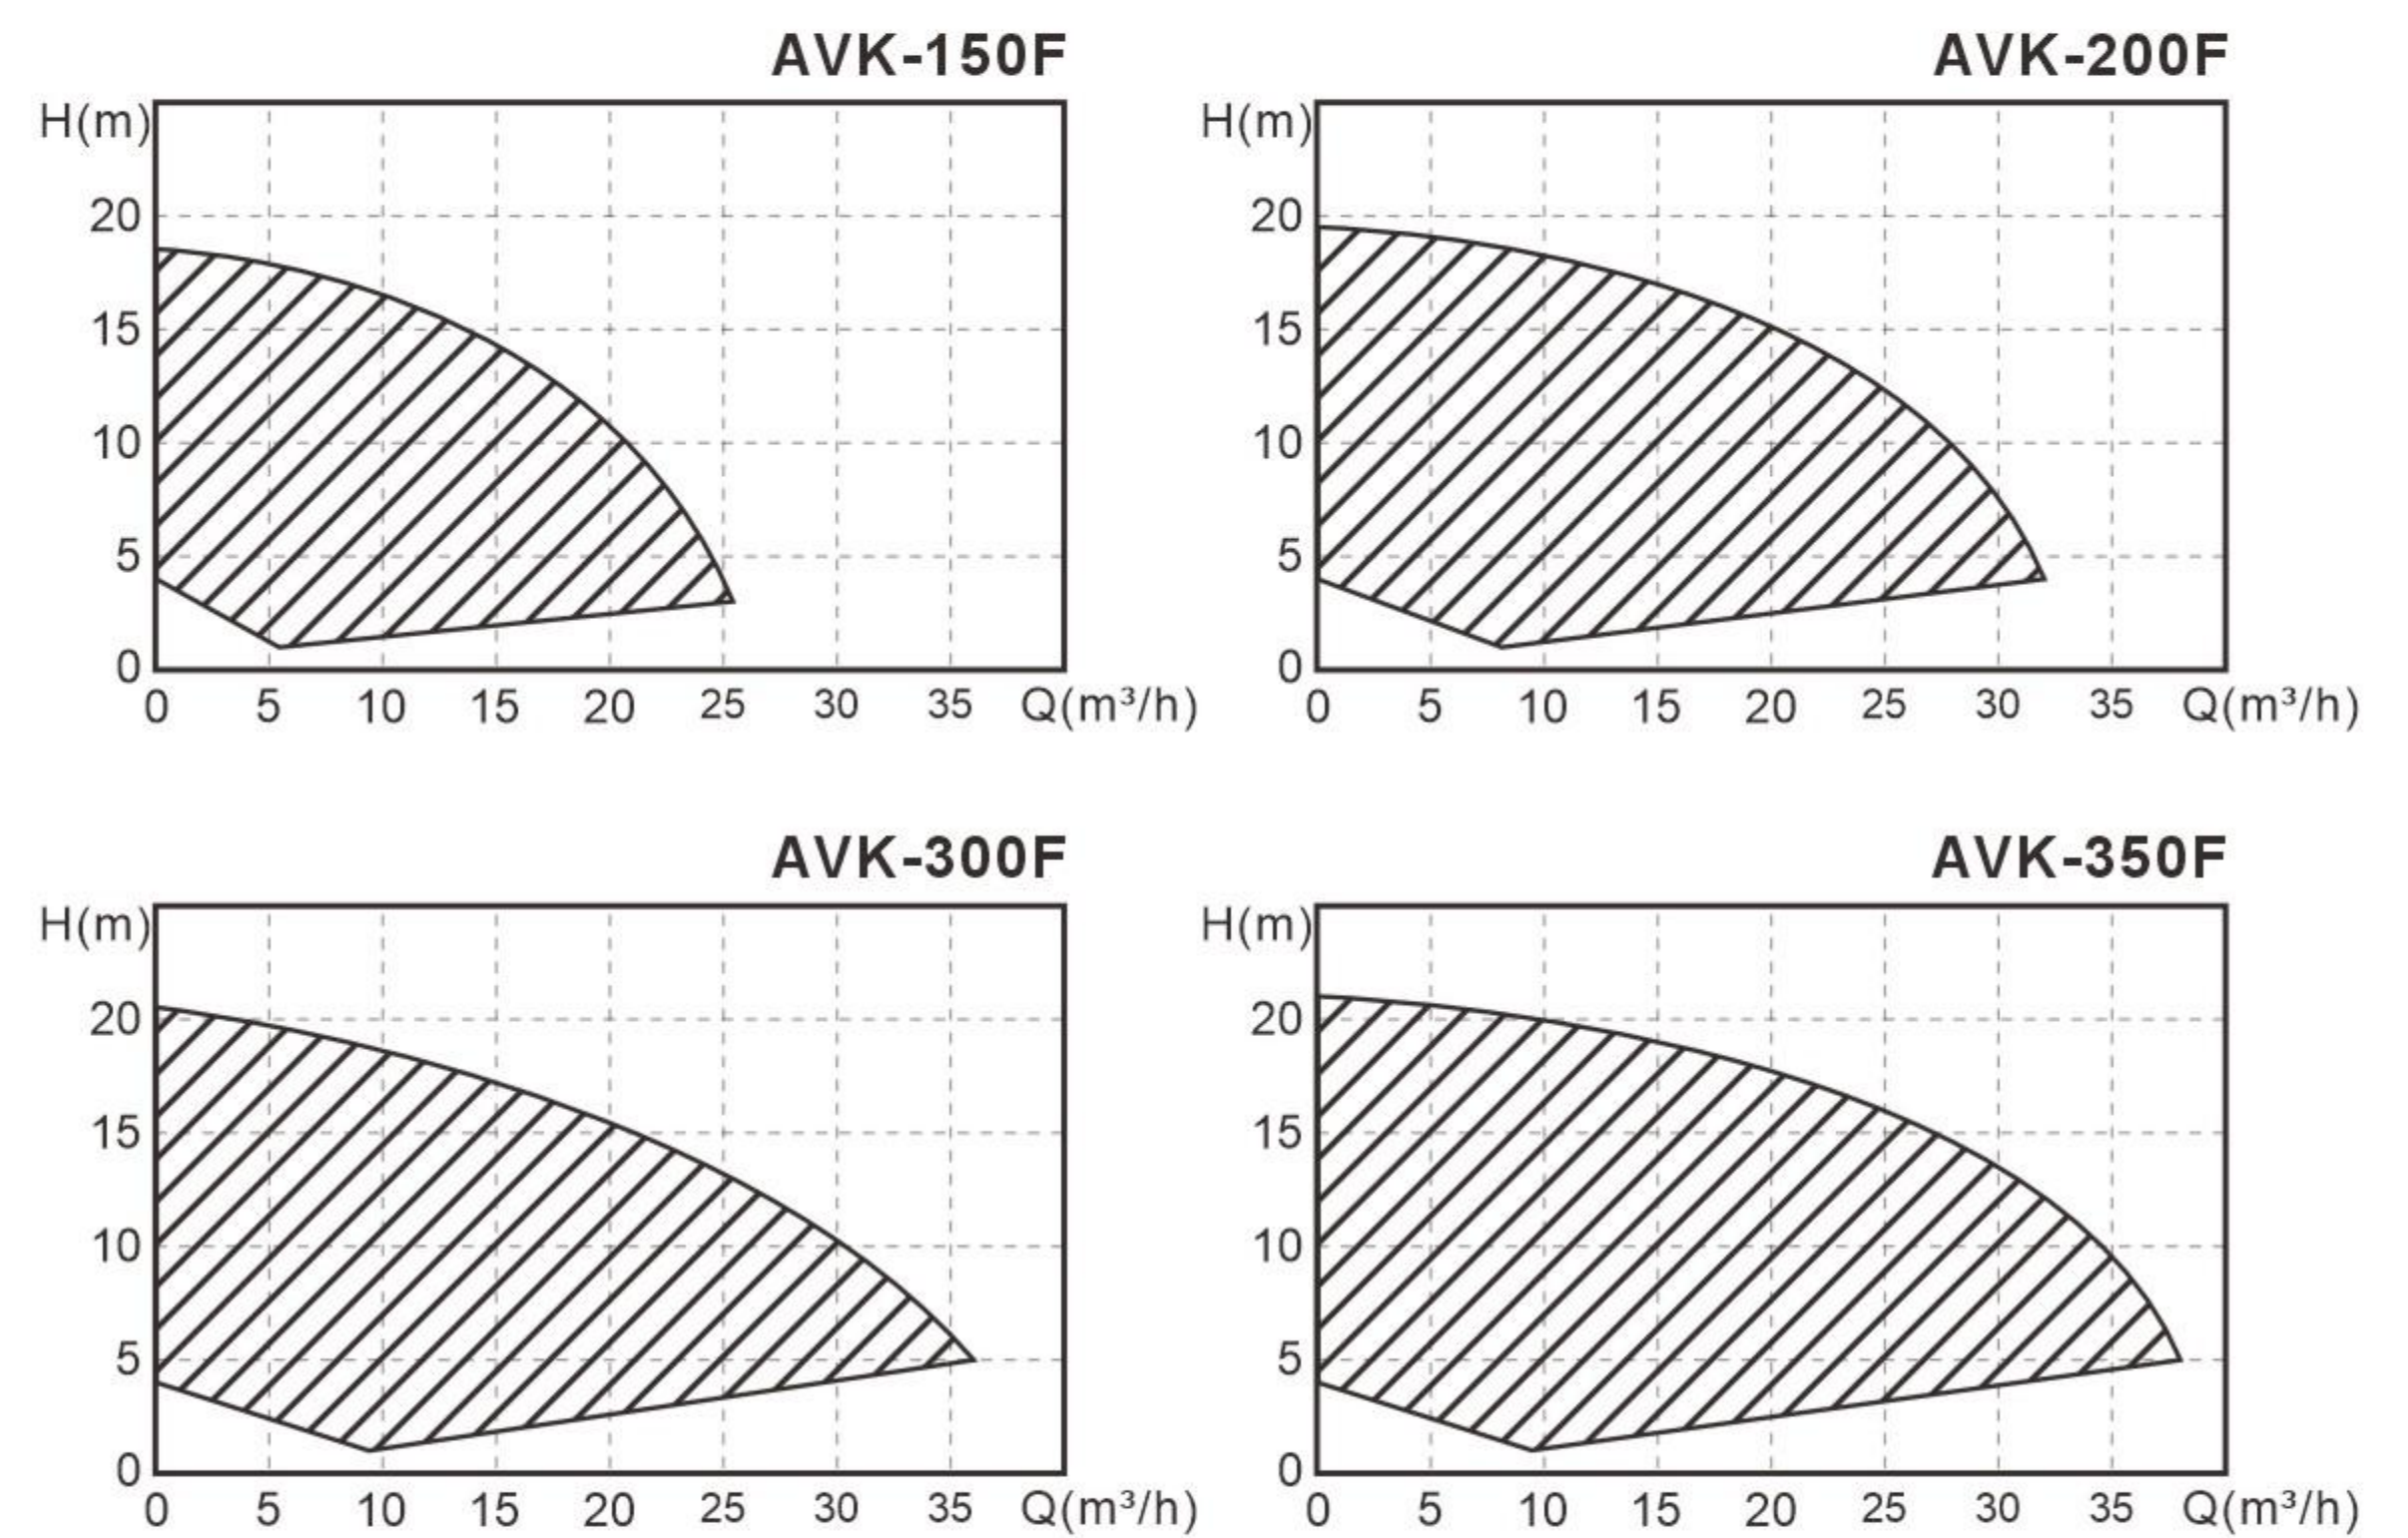

VARIABLE SPEED SWIMMING POOL PUMP

AQUA

Product Features

- Quiet variable frequency motor, advanced hydraulic design, water moves much more efficiently.
- Intelligent control, clearly displays operating power, motor speed, time setting, and operating status.
- Smart Speed Adjustment: One-touch intelligent speed regulation: Low speed 1400 rpm, Medium speed 2000 rpm, High speed 2900 rpm.
- 316L stainless steel machine shaft, pump body integrated with transparent sight glass and hair collection basket.
